

# Introduction to Funding Policy Review

### Gavi Board has approved new 6.0 strategy

**Gavi 6.0 strategy one-pager** (2026 – 2030)

VISION

MISSION

**PRINCIPLES** 

GOALS

#### Leaving no one behind with immunisation

To save lives and protect people's health by increasing equitable and sustainable use of vaccines

- Country-led, sustainable
- Community-owned, inclusive
- Zero-dose and missed communities, first priority
- Gender-focused

- Differentiated, fragile-responsive
- Integrated
- Adaptive, resilient

- Climate-sensitive
- Innovative
- Collaborative, accountable

**INTRODUCE AND SCALE UP VACCINES** 

**STRENGTHEN HEALTH SYSTEMS TO INCREASE EQUITY IN IMMUNISATION** 

**IMPROVE PROGRAMMATIC** AND FINANCIAL **SUSTAINABILITY OF IMMUNISATION PROGRAMMES** 

**ENSURE HEALTHY MARKETS FOR VACCINES AND** RELATED **PRODUCTS** 

- Long-term predictable funding
- One Alliance
- Global political commitment

- Simple, efficient and agile Gavi operating model
- Digitalisation, improved data and evidence
- Collaboration with private sector and development finance institutions

### A new health Systems Strategy for Gavi 6.0 is being developed to strengthen Equity and Programmatic Sustainability

Objective: Enhance health systems' capacity to deliver immunisation, including through disruptive innovation, with two primary goals:

- Programmatic sustainability: Strengthen country capacity to sustain immunisation coverage
- Equity: Support countries to reach and fully immunise children, focusing on missed communities, and work with others to co-deliver other primary health care (PHC) services

**Differentiate investments** through tailored programming (including in fragile contexts) focused on core set of country priorities, with increasing level of catalytic versus operational support

Streamline funding architecture, requiring adjustment to Gavi's Health Systems and Immunisation Strengthening (HSIS) allocation formulae

Enhance partnership approach to ensure clearer roles, responsibilities and accountabilities, more aligned support for country priorities and stronger leveraging of private sector to scale-up innovation

**Strengthen monitoring and measurement** by prioritising investment in country data systems and visibility leveraging digital technologies, and enhance peer-to-peer learning

### Gavi's core funding policies are also being revised to align with the objectives of Gavi 6.0 and HS strategy

### **Co-financing Policy**

Vaccine procurement: rules, safeguards and exceptions

### Funding Policy Framework

Overarching narrative document that outlines the key principles and interactions between the three policies

### **Eligibility and Transition Policy**

Sustainable progress: readiness, criteria and phases

Sustainable and equitable immunisation, system-wide support

2. Analysis

Developing options for key changes to ELTRACO and HSS policies including consolidation of funding levers

3. Consultations

Consultations to **develop options/ trade-offs** with Gavi Alliance, country /
CSO consultations, manufacturers,
donors etc

Public policy consultation

Consultations on **policy language**, Donor, CSO, country consultation, PPC/Board members)

4. Policy drafting

& Paper writing

Drafting PPC & Board papers

Policy Drafting & finetuning

Drafting PPC & Board papers

5.
Operationalizing policy/ SOPs etc

Developing operationalisation material concurrently to drafting policies

## Board has given guidance on the following shifts aimed at fostering sustainability and ensure successful transition

ISF countries

a Introducing price sensitivity for Initial Self financing countries

PT+ AT countries

**b** Updating Gavi's eligibility threshold

PT countries

c Slowing down annual co-financing increase by making it linear and/or capping it

AT countries

- d Providing minimum years of co-financing support for new vaccine introductions
- Decoupling the transition from vaccine and cash support for countries at risk of unsuccessful programmatic transition<sup>1</sup>

Fragile countries

- Exploring the possibility of further differentiating co-financing rules for a subset of fragile countries facing humanitarian crisis
- Developing a learning agenda to test some elements of the transition by vaccine model

Programme and Policy Committee Meeting, 15-16 May 2024

<sup>1.</sup> Transitional arrangement in Gavi 6.0 until the new Health System Strategy is fully implemented; only for a subset of countries demonstrating clear needs (indicators to be defined as part of the Funding Policy Review) and subject to strong conditionalities

### The MICs Approach becomes the Catalytic phase of the ELTRACO model

Gavi 6.0 Objectives

>

Levers of support in Catalytic phase

Drive sustainable introduction of key missing vaccines

**Country-level catalysers** (e.g. vaccine catalytic financing) leveraged through partnerships with Global Health Initiatives

Support access to **existing pooled procurement mechanisms** (e.g. through UNICEF's MICs Financing Facility)

**Multi-country technical assistance** 

Prevent and mitigate backsliding

Targeted interventions for selected Former Gavi-eligible countries; leveraged through partnerships with Multilateral Development Banks

Ensure support for fragile countries

Harmonised support explored in new Fragile, Conflict and Humanitarian Settings sub-strategy and not included in the funding envelope<sup>1</sup>

Eligibility:
Former and
Never Gavi
Lower
MiddleIncome
Countries
and / or
eligible for
the
International
Development
Association

Indicative financial implications: US\$ 250 million

Scope of countries for each lever further concretised through the Funding Policy Review

### Gavi's Health systems & Immunisation strengthening policy will review the following:

One cash envelope for countries- using NIS to prioritise different objectives and make trade offs

Success requires joined up planning at country level across vaccine introductions, routine delivery and campaigns across touchpoints

What exact levers should be consolidated into one grant

How to allocate funding to each country in a transparent, equitable & predictable way in a consolidated grant

How to ensure vaccine introduction and campaign needs are reflected in a consolidated grant

How much should minimum investment for CSOs be in consolidated grant

How to encourage countries to co-invest in health systems, including CCEOP joint investment
